TRANSMITTAL OF TRANSLATION OF THE INTERNATIONAL PRELIMINARY REPORT ON PATENTABILITY

Commissioner for Patents P.O. Box 1450 Alexandria, VA 22313-1450

Dear Sir:

Applicant submits herewith the English-language translation of the International Preliminary Report On Patentability ("IPRP") which issued in the corresponding international application. The international Examiner has deemed claims 1-30 to possess novelty and industrial application. Each reference cited in the IPRP has been cited by Applicant in an Information Disclosure Statement filed with the United States Patent and Trademark Office.

The Director is hereby authorized to charge any deficiency in the fees filed, asserted to be filed or which should have been filed herewith (or with any paper hereafter filed in this application by this firm) to our Deposit Account No. 03-2775, under Order No. 05587-00400-US.

Respectfully submitted.

Ashley I. Pezzner

WRITTEN OPINION OF THE INTERNATIONAL SEARCHING AUTHORITY

International application No.
PCT/EP2004/009810

	Box No. I Basis of this opinion
	 With regard to the language, this opinion has been established on the basis of the international application in the language in which it was filled, unless otherwise indicated under this item.
	This opinion has been established on the basis of a translation from the original language into the following language
	, which is the language of a translation furnished for the purposes of international search (under
	Rule 12.3 and 23.1(b)).
	2. With regard to any nucleotide and/or amino acid sequence disclosed in the international application and necessary to the claimed invention, this opinion has been established on the basis of:
	a. type of material
	a sequence listing
	table(s) related to the sequence listing
	b. format of material .
	in written format
	in computer readable form.
	c. time of filing/furnishing
	contained in the integrational application as filed.
	flied together with the international application in computer readable form.
!	furnished subsequently to this Authority for the purposes of search.
	3. In addition, in the case that more than one version or copy of a sequence listing and/or table(s) relating thereto has been filed or furnished, the required statements that the information in the subsequent or additional copies is identical to that in the application as filed or does not go beyond the application as filed, as appropriate, were furnished.
	4. Additional comments:

		(For precise positions in the text, see search report)	
	1.	Novelty	
		POM block copolymers having the coupling groups claimed	
		between the segments were not found in the search; the subject matter of the claims is therefore novel.	
	`2 . <u>-</u>	In ventive step	• • •
	2.1.	and problem application, For Segments are bound	
		via particular coupling groups (e.g. carbonate groups) to various further polymer segments; the coupling groups are introduced by means of particular bifunctional reagents.	
	2.2.	D1 describes POM block copolymers in which, according to the same principle, the POM segments are bound via bifunctional	
		coupling reagents to a further polymer segment. However, in contrast to the application, other couplers are used in D1 and other coupling groups are thus introduced.	ĺ
	2.3.	The object to be achieved relative to D1 was then to provide further coupling groups between POM and other polymer	
		segments.	- 1

Form PCT/ISA/237 (Box No. V) (January 2004)

PAGE 9/10 * RCVD AT 8/28/2006 4:34:21 PM [Eastern Daylight Time] * SVR:USPTO-EFXRF-2/6 * DNIS:2738300 * CSID:302 661 2331 * DURATION (mm-ss):02-34

WRITTEN OPINION OF THE INTERNATIONAL SEARCHING AUTHORITY

International application No.
PCT/EP2004/009810

	INTERNATIONAL SEARCHING AUTHORITY PCT/EP2004/009810
Box No. V	Reasoned statement under Rule 43bis.1(a)(i) with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement
2.4.	According to D2, block copolymers comprising various polyether
ı	segments are bridged, for example, by means of carbonate
	groups using dialkyl carbonate (R-O-C(=0)-OR) as bifunctional
	coupling reagent. However, other polyether units are reacted
	as POM.
	For a person skilled in the art who has set himself the object
	of finding alternative couplers to D1, it would have been
	obvious to try the abovementioned carbonate reagents in order
	to prepare, for example, POM polyether copolymers (cf.
	examples in the application).
	The fact that linking POM block copolymers via various
	functional groups (carboxyl, carboxylic anhydride, etc.) (cf.
	D3, D4) makes the approach even more obvious.
